## Letter of Recommendation for CRISP

Hanoi, 12.06.2019

From February to April 2019 CRISP developed and implemented a simulation game about the future of regional integration in South-East Asia for the Konrad-Adenauer-Stiftung (KAS) Vietnam in cooperation with the Diplomatic Academy of Vietnam (DAV). Apart from the implementation at DAV during a two-day workshop, a capacity building component was organized for staff members to enable them to make use of the simulation tool independently in the future.

The workshop was very well received by the participants as it gave them the chance to learn about the complex topic of regional integration in an interactive manner while at the same time enhancing their skills in negotiating and public speaking.

Our experience in cooperating with CRISP was excellent. They showed a high level of professionalism in all phases, from the development of a tailor-made scenario to the skilful implementation of the workshop. During the process they adapted very well to the needs expressed by the local partners and managed to keep the focus on the commonly agreed upon learning goals. I can therefore highly recommend them as a reliable partner for the use of simulation games in civic education and other thematic fields.
